

CG is a leading of manufacturing power transformer at South East Asia which is established in 1990 as a joint venture company between Belgium Company and Indian Company.

The company operates a custom built facility for power transformer manufacture in a 13,500m² factory area, plus office and support buildings, designing and manufacturing power transformers and auto transformers.

The factory is located on a land area of 35,000 m² in an industrial complex located at Cileungsi-Bogor, approximately 30 km south of Jakarta towards Bogor.

The factory has an annual capacity of »9,000 MVA, or approximately 120 units, per year, and sales turn over 120 million USD with its current configuration. The factory was planned to enable additional output by adding machinery and equipment internally.
